-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 February 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

Claim Rejections - 35 USC § 112

Claims 1 – 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1 and 9, it is not clear as to whether there are a plurality of “steps” of calculating (the calculating which of the first and second gear ratios has only been recited once); also, “repeating ... calculating a plurality of times” is vague and indefinite as it is not readily apparent as to how many times per se the skilled artisan would have to repeat the calculating step. Claims depending upon claims 1 and 9 are necessarily rejected.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1 – 26 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Art Unit: 3661

Claims 1, 9, and 17 call for ***determining whether a vehicle gearbox is engaged in at least a first gear ratio or a second gear ratio***. Such a determination appears to be carried out automatically, i.e., without any operator intervention. However, the claims recite ***selecting between the first and the second gear ratios***. None of the recited limitations suggest the "determination" claimed. Therefore, undue experimentation is required and the skilled artisan would not know how to make and/or use the invention.

Claims depending upon claims 1, 9, and 17 are necessarily rejected.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. USPN 5,498,216 A to Betsche et al. teaches automatic gear selection and verification of whether an actually engaged gear is a desired gear.
